AFTER THE RAILROADS.

Washington, April 26.—The house committee on Pacific railways to-day adopted the bill formulated by the sub-committee, Graham, the Murderer of His of the bonded debt of the Pacific road to the government. The bill, as unanimously agreed upon by the committee, makes provision for the payment of the indebtedness of the Pacific roads to the government after the following plan: To the present debt is added interest that would accrue during the lifetime along years of the gristing bonds. lifetime—eleven years—of the existing bonds, assuming that no further payments are made by the companies, the total divided into 140 equal payments, which are represented by a series of bonds falling due semiannually, the last bond maturing seventy years after date of issue. The annual payments by the company would reach nearly \$4,000,000, which it is estimated would

amount to a sum greater than the principa of debts before the bonds would mature. REPUBLICAN NATIONAL COMMITTEE.
